

*王燕玲博士

所有發表期刊論文

1. Wu LW, Wang YL, Christensen JM, Khalifian S, Schneeberger S, Raimondi G, Cooney DS, Lee WP, Brandacher G. Donor age negatively affects the immunoregulatory properties of both adipose and bone marrow derived mesenchymal stem cells. *Transpl Immunol*. 2014.
2. Lao WW, Wang YL, Ramirez AE, Cheng HY, Wei FC. A new rat model for orthotopic abdominal wall allotransplantation. *PRS GO*, 2014.
3. Cheng HY, Ghetu N, Huang WC, Wang YL, Wallace CG, Wen CJ, Chen HC, Shih LY, Lin CF, Hwang SM, Liao SK, Wei FC. Syngeneic adipose-derived stem cells with short-term immunosuppression induce vascularized composite allotransplantation tolerance in rats. *Cytotherapy*. 2014;16(3):369-80.
4. Chou FC, Kuo CC, Wang YL, Lin MH, Linju Yen B, Chang DM, Sytwu HK. Overexpression of galectin-9 in islets prolongs grafts survival via downregulation of Th1 responses. *Cell Transplant*. 2013;22(11):2135-45.
5. Wang YL, Chou FC, Chen SJ, Lin SH, Chang DM, Sytwu HK. Targeting pre-ligand assembly domain of TNFR1 ameliorates autoimmune diseases – an unrevealed role in downregulation of Th17 cells. *J Autoimmun*. 2011;37(3):160-170.
6. Chen SJ, Wang YL, Fan HC, Lo WT, Wang CC, and Sytwu HK. Current status of the immunomodulation and immunomediated therapeutic strategies for multiple sclerosis. *Clin Dev Immunol*. 2012. *Clin Dev Immunol*. 2012;2012:970789.
7. Wang YL, Chou FC, Sung HH, Fan PL, Hsueh CW, Lin WC, Chen SJ, Lin WW, and Sytwu HK. Decoy receptor 3 protects non-obese diabetic mice from autoimmune diabetes by regulating dendritic cell maturation and function. *Mol Immunol*. 2010;47(16):2552-2562.
8. Chen SJ, Wang YL, Lo WT, Wu CC, Hsieh CW, Huang CF, Lan YH, Wang CC, Chang DM, and Sytwu HK. Erythropoietin enhances endogenous haem oxygenase-1 and represses immune responses to ameliorate experimental autoimmune encephalomyelitis. *Clin Exp Immunol*. 2010;162(2):210-223.
9. Chen SJ, Wang YL, Kao JH, Wu SF, Lo WT, Wu CC, Tao PL, Wang CC, Chang DM, and Sytwu HK. Decoy receptor 3 ameliorates experimental autoimmune encephalomyelitis by directly counteracting local inflammation and downregulating Th17 cells. *Mol Immunol*. 2009;47(2-3):567-574.
