

*歐陽品教授

所有發表期刊論文

1. Lin H.S., W.P. Cheng, P. Ouyang and S.M.Wang 1989. A unique microvesicular Sphere associated with the Golgi complex of gonadotrophs in the golden hamster. *Cytobios* 60:177-87.
2. Ouyang P. and H.S. Lin 1991. Ultrastructural localizaion of cytochrome oxidase and Monoamine oxidase on microcylinder, a Long-Evans rat-specific mitochondrial Inclusion. *J. Histochem. Cytochem.* 39:205-12.
3. Ouyang P. and S.P. Sugrue 1992. Identification of an epithelial protein related to the Intermediate filament complex. *J. Cell Biol.* 118:1477-88.
4. Ouyang P. and S.P. Sugrue.1996. Characterization of pinin, a novel protein associated with the desmosome-intermediate filament complex. *J. Cell Biol.* 135:1027-1042.
5. Ouyang P*, Y.Y. Zhen. and S.P. Sugrue 1997. Cloning and analysis of cDNA encoding murine pinin. *GENE* 197:115-120.
6. Ouyang P*. 1998. An in vitro model to study mesenchymal epithelial transformation. *Biochem. Biophys. Res.Com* 246:771-776.
7. Ouyang P*. 1999. Antibodies differentiate desmosome-form and nucleus-form pinin: evidence that pinin is a moonlighting protein with dual location at the desmosome and within the nucleus. *Biochem. Biophys. Res. Com.* 263: 192-200.
8. Shi Y., P. Ouyang and S.P. Sugrue. 2000. Characterization of the gene encoding pinin/DRS/memA and evidence for its potential tumor suppressor function. *Oncogene* 19:289-297.
9. Wang P., P.J. Lou, S. Leu and P. Ouyang* 2002. Modulation of alternative pre-mRNA splicing in vivo by pinin. *Biochem. Biophys. Res. Com.* 294: 448-455.
10. Chang W.L., D.C. Lee, S. Leu, Y.M. Huang, M.C. Lu and P. Ouyang* 2003. Molecular characterization of a novel nucleolar protein, pNO40. *Biochem. Biophys. Res. Com.* 307:569-577.
11. Li C., R.I. Lin, M.C. Lai, P. Ouyang and W.Y. Tarn 2003. Nuclear pnn/DRS protein binds to spliced mRNPs and participates in mRNA processing and export via interaction with RNPS1. *Mol. Cell Biol.* 23: 7363-76.
12. Lin C.L., S. Leu, M.C. Lu and P. Ouyang* 2004. Over-expression of SR-cyclophilin, an interaction partner of nuclear pinin, releases SR family splicing factors from nuclear speckles. *Biochem. Biophys. Res. Com.* 321:638-647.

13. Leu S., and P. Ouyang* 2006. Spatial and temporal expression profiles of Pinin during mouse development. *Gene Exp. Patterns* 6: 620-631
14. Chiu Y., and P. Ouyang* 2006. Loss of Pnn expression attenuates expression levels of SR family splicing factors and modulates alternative pre-mRNA splicing in vivo. *Biochem. Biophys. Res. Com.* 341: 663-671
15. Chou AH, TH Yeh, Ouyang P, YL Chen, SY Chen and HL Wang 2008. Polyglutamine-expanded ataxin 3 causes cerebellar dysfunction of SCA3 transgenic mice by inducing transcriptional dysregulation. *Neurobiol. Disease* 31:89-101.
16. Ouyang P* 2009. SRrp37, a novel splicing regulator located in the nuclear speckles and nucleolus, interacts with SC35 and modulates alternative pre-mRNA splicing in vivo. *J. Cell Biochem.* 108:304-314.
17. Chang Y.C., Y.J. Chen, C.H. Wu, Y. C. Wu, T.C. Yen and P. Ouyang* 2010. Characterization of centrosomal proteins Cep55 and pericentrin in intercellular bridges of mouse testes. *J. Cell. Biochem.* 109:1274-1285.
18. Hsu S.Y., Y.J. Chen and P. Ouyang* 2011. Pnn and SR family proteins are differentially expressed in mouse central nervous system. *Histochem. Cell Biol.* 135:361-373.
19. Chang Y. C., C.H. Wu, T.C. Yen and P. Ouyang* 2012. Centrosomal protein 55 (Cep55) stability is negatively regulated by p53 protein through polo-like kinase 1 (PLK1). *J. Biol. Chem.* 287:4376-4385.
20. Leu S., Y. M. Lin, C. H. Wu and P. Ouyang* 2012. Loss of pnn expression results in mouse early embryonic lethality and cellular apoptosis through SRSF1-mediated alternative expression of Bcl-xS and ICAD. *J. Cell Sci.* 125:3164-3172.
21. Hsu S.Y., Yi-Chuan Cheng, Hung-Yu Shih and P. Ouyang* 2012. Dissection of the role of Pinin in the development of zebrafish posterior pharyngeal cartilages. *Histochem. Cell Biol.* 138:127-140.
22. Wu Hsu-Pin, Shu-Yuan Hsu, Wen-Ai Wu, Ji-Wei Hu and P. Ouyang* 2014. Transgenic mice expressing mutant Pinin exhibit muscular dystrophy, nebulin deficiency and elevated expression of slow-type muscle fiber genes. *Biochem. Biophys. Res. Com.* 443: 313-320.
23. Pan T. L., Y.T. Chan and P. Ouyang* 2014. Proteomic tools reveal that over-expression of FLJ25439 induces cellular tetraploidy and oxidative stress response. *Cell Cycle* (revision)
