書名：Conflict of Interest in Medical Research,  
Education, and Practice

作者：Bernard Lo

索書號：W50 C748 2009

#### 內容簡介：

Conflict of Interest in Medical Research, Education, and Practice provides a comprehensive look at conflict of interest. It offers principles to inform the design of policies to identify, limit, and manage conflicts of interest without damaging constructive collaboration with industry. This book makes several recommendations for strengthening conflict of interest policies and curbing relationships that create risks with little benefit. Conflict of Interest will serve as an invaluable resource for individuals and organizations committed to high ethical standards in all realms of medicine.
