FEATURES

15. How private providers are feeling the pinch
    The economic downturn has meant hard times for the UK’s private healthcare providers.
    Sophie Goodchild reports

ANALYSIS

18. Attention-deficit/hyperactivity disorder: are we helping or harming?
    The criteria for diagnosing ADHD are subjective and expanding. Rae Thomas and colleagues explain how enthusiastic diagnosis in children with mild symptoms could result in harm, and undermine the value of the diagnosis in children with severe symptoms
COMMENT

LETTERS
21 Methylphenidate for moderate ADHD; Long acting β2 agonists in asthma

Help them leave their cow's milk allergy symptoms behind

Nutramigen LIPL is the only specialised infant feed with published clinical evidence of reaching oral tolerance to cow's milk

• Short term symptom relief1 and tolerance to cow's milk2
• Tolerance supports improved quality of life for both mother and child2
• Tolerance can avoid unnecessary healthcare costs by reducing treatment time1
