MECHANISMS OF RHINOSINUSITIS, ALLERGY AND OTHER RHINOLOGIC DISEASES
444 Increased endothelin 1 type B receptors in nasal lesions of patients with granulomatosis with polyangiitis
I. Dimitrijevic and L. Edvinsson

451 Physical exercise increases nasal patency in asthmatic and atopic preschool children

DIAGNOSIS AND MEDICAL TREATMENT
457 Characterizing rhinitis subtypes
J. A. Bernstein

461 Evidence-based treatment of chronic rhinosinusitis with nasal polyps
R. J. Schlosser and Z. M. Soifer

467 Chronic rhinosinusitis and antibiotics: The good, the bad, and the ugly
J. L. Kennedy and L. Berish

473 Epidemiology and differential diagnosis of nasal polyps
M. R. Chaiban, E. M. Walsh, and B. A. Woodworth

479 Medications prescribed at ambulatory visits for nasal polyposis
N. Bhattocharyya and L. J. Kaplan

482 Leukotriene antagonists in nasal polyposis: A meta-analysis and systematic review
J. L. Wentzel, Z. M. Soifer, K. DeYoung, S. A. Nguyen, S. Lobin, and R. J. Schlosser

490 The impact and treatment of allergic rhinitis in the Middle East: A comparison with the landmark allergy surveys from other worldwide regions
U. H. Hadi and H. A. Rahman

495 Over diagnosis of persistent allergic rhinitis in perennial allergic rhinitis patients: A nationwide study in Mexico

502 A hospital-based survey on the prevalence of bronchial asthma in patients with allergic rhinitis in southern China
H. Hong, Q. Yang, K. Zuo, X. Chen, W. Xia, M. Li, X. Li, G. Xu, H. Li, Y. Fan, and On behalf of Nasal Health Group, China
Allergic rhinoconjunctivitis in the Australian population: Burden of disease and attitudes to intranasal corticosteroid treatment
C. H. Katelaris, R. Sacks, and P. N. Theran

Intranasal corticosteroids topical characteristics: Side effects, formulation, and volume
D. A. Petty and M. S. Blais

Effect of intranasal azelastine on substance P release in perennial nonallergic rhinitis patients
R. Gawlik, B. Jawor, B. Rogata, S. Parzynski, and L. DuBaske

Nanofiltered Cl esterase inhibitor for treatment of laryngeal attacks in patients with hereditary angioedema
M. A. Riedl, W. R. Lunney, H. H. Li, T. J. Craig, D. Fitts, J. Kalfus, and M. E. Uknis

Managing hereditary angioedema patients undergoing otolaryngeal procedures
J. A. Bernstein

Serum 25-hydroxyvitamin D levels are lower in chronic rhinosinusitis with nasal polyposis and are correlated with disease severity in Taiwanese patients

Does eosinophilic inflammation affect the outcome of endoscopic sinus surgery in chronic rhinosinusitis in Koreans?

Aspirin challenge in patients with chronic rhinosinusitis with polyps correlates with local and systemic inflammatory markers
B. Foren, R. Landsborg, and S. Kwity

Effect of lidocaine-soaked nasal packing on pain relief after endoscopic sinus surgery
J.-H. Ma, Y.-M. Park, and Y.-J. Chung

Chronic rhinosinusitis confers an increased risk of acute myocardial infarction
P.-C. Wang, H.-C. Lin, and J.-H. Kang

The interaction between bacteria and mucosal immunity in chronic rhinosinusitis: A prospective cross-sectional analysis

Effectiveness of lumbar drains on recurrence rates in endoscopic surgery of cerebrospinal fluid leaks
S. Albu, E. Emanuelli, V. Trombitas, and I. S. Florion

Increased body mass index and bronchial impairment in allergic rhinitis

Abstracts from the World Rhinology Literature

ONLINE ARTICLES—WWW.AJRA.COM
Surgical treatment of nasal polyposis: A comparison between cutting forceps and microdebrider

G. Tirelli, A. Gatto, G. Spinato, and M. Tofanelli

About the cover: Biofilm (yellow) on the surface of epithelium. Please see pg. 469 for details. Cover graphic credit: Zach Kennedy, Adair Creative Studio, Bentonville, AR 72712.

American Journal of Rhinology & Allergy posts select in-press articles online, in advance of their appearance in the print edition. These articles, referred to as “Fast Track” articles are available at the American Journal of Rhinology & Allergy web site, www.AJRA.com by clicking on the “on line access” link, which connects to the journal’s Ingenta web site and the Fast Track link. Each print article will acknowledge the e-publication date (the date when the article first appeared online). As soon as an article is published online, it is fully citable through use of its Digital Object Identifier (DOI).
