

Image-guided IMRT

2006 460 pages hardback

ISBN-10 3-540-20511-X

Table of Contents

Foundations: Clinical rationale of IMRT.- The physical potential of IMRT.-
Imaging the Lymph Nodes: CT, MRI, PET.- Morphology imaging.- IMRT plan
optimization.- Practical IMRT planning.- IMRT Dose calculation.- IMRT
delivery techniques.- Biological considerations of IMRT planning and delivery.-
Image guided patient setup.- IMRT QA (European perspective).- IMRT QA (US
perspective).- Advanced Image Guided and Biologically Driven Techniques:
Functional and biological imaging (PET, SPECT, MRI-MRS).- Tumor imaging
for dose painting.- Biological/functional-image guided optimization.- Biological
optimization.- Image guided patient setup (and immobilization).- Adaptive
IMRT (Linac).- Adaptive IMRT (Tomotherapy).- 4D CT.- 4D TP concepts.-
Gating and tracking.- Clinical: Paranasal sinus.- Oropharynx.- Nasopharynx.-
Larynx.- CNS, Skull Base and Paraspinal Tumors.- Chest.- Breast.-
GI/Abdomen.- Prostate.- GYN.- Combination of IMRT with other modalities.-
High precision.
