John P. Bent, MD, and Arvind Badhey
- Review of *Rhinology and Endoscopic Skull Base Surgery (Otorhinolaryngology-Head and Neck Surgery Series)* 83
Waleed M. Abuzeid, MD

Cover image: (Top) Endoscopic findings via the nasal cavity of the submucosal large tumor. The epiglottis (*) is slightly leaning backward because of the tumor. (Bottom) Coronal T1-weighted magnetic resonance image with contrast medium showing a 30 × 25 mm well-enhanced tumor that occupies most of the pharyngeal cavity. From "Clear Cell Carcinoma of the Base of the Tongue: Case Report and Literature Review" by Watanabe et al, pp 55-61.
