

CONTENTS

1. CELLULAR NEUROSCIENCE	
1.1. Molecular Neurobiology and Neurogenetics	1437
1.2. Nervous System Development	1439
Early development	
Neural crest	
Brain and spinal cord	
Peripheral nervous system	
Sensory-auditory	
Sensory-vestibular	
Sensory-visual	
Sensory-somaesthetic	
1.3. Transplantation and Regeneration	1440
1.4. Neurotrophic Factors (including nerve growth factor) (NGF)	1441
1.5. Nerve and Glial Cell Biology	1442
1.6. Receptor Transduction Mechanisms	1444
GTP and G proteins	
cAMP and cGMP	
Phosphorylation and protein kinases	
Inositol phosphates	
Calcium	
Arachidonic acid metabolites	
1.7. Ion Channels	1446
Sodium	
Potassium	
Calcium	
Chloride	
Intracellular pH	
1.8. Enzymes	1446
1.9. Processes and Products of Metabolism	1447
1.10. Lipids, Glycolipids, and Polysaccharides	1447
1.11. Myelin and Membrane Studies	1448
1.12. Proteins	1448
Structure	
Biosynthesis and processing	
Amyloid protein	
2. NERVE STRUCTURE AND FUNCTION	
2.1. Physiology of Nerve Cells	1451
Dendrites	
Axons	
Terminals	
Synaptic transmission	
Bioelectric potentials and membrane permeability	
Neuronal plasticity	
3. PHYSIOLOGY AND PHARMACOLOGY OF THE PERIPHERAL NERVOUS SYSTEM	
3.1. Innervation of Skeletal Muscle	1455
3.2. Innervation of Smooth Muscle	-
3.3. Motoneurons and Spinal Reflexes	1455
3.4. Neuromuscular Junction	1456
3.5. Innervation of the Lungs	-
3.6. Innervation of Cardiac Muscle	-
3.7. Innervation of the Blood Vessels	-
3.8. Innervation of the Kidney	-
3.9. Innervation of Adrenal Glands	1456
3.10. Innervation of Urinary Tract	1456
3.11. Innervation of Reproductive Organs	-
3.12. Innervation of Salivary Glands	-
3.13. Innervation of Oesophagus	-
3.14. Innervation of the Stomach	-
3.15. Innervation of the Intestine	-
3.16. Innervation of Pancreas	-
3.17. Innervation of the Liver and Gall Bladder	-
3.18. Innervation of Spleen	-
3.19. Sympathetic Nervous System	1456
3.20. Parasympathetic Nervous System	1456
3.21. Enteric Nervous System	1456
3.22. General Autonomic Nervous System	1457
3.23. Local Anaesthetics	-
4. PHYSIOLOGY OF THE CENTRAL NERVOUS SYSTEM	
4.1. Blood Brain Barrier	1457
4.2. Cerebrospinal Fluid	1457
4.3. CNS and Nerve Circulation	1457
4.4. Spinal Cord	1457
4.5. Meninges	-
4.6. Cranial Nerves	-
4.7. Brain Stem	1458
Medulla	
Pons	
4.8. Midbrain	1458
4.9. Cerebellum	1458
4.10. Basal Ganglia	1459
4.11. Amygdala	1459
4.12. Hippocampus	1459
4.13. Cerebrum	1461
4.14. Olfactory Bulb	1462
4.15. Visual Cortex	1462
4.16. Habenula	-
4.17. Corpus Callosum	1463
4.18. General Telencephalon	-
4.19. Thalamus	1463
4.20. Hypothalamus	1463
4.21. General Diencephalon	-
4.22. Pituitary Gland	-
Anterior lobe	
Intermediate lobe	
Posterior lobe	
4.23. Pineal	1464
4.24. Ventricles	-
4.25. Dorsal Root Ganglia	1464
4.26. CNS Tracts	-
4.27. Sexual Dimorphism	-
4.28. Brain Morphology	1464
4.29. Neural Networks	1464
5. PHARMACOLOGY OF THE CENTRAL NERVOUS SYSTEM	
5.1. Drugs for Parkinson's Disease	1467
5.2. Other Movement Disorders	-
5.3. Muscle Relaxants (Central)	1467
5.4. General Anaesthetics	1467
5.5. Anxiolytics (including Benzodiazepine Receptors)	1467
5.6. Sedatives and Hypnotics	1467
5.7. Antipsychotics	1468
5.8. Anticonvulsants	1468
5.9. Analgesics and Antipyretics	1469
5.10. Memory	1469
5.11. Stimulants and Anorectics	1469
5.12. Hallucinogens	1470
5.13. Antidepressants	1470
5.14. Anti-emetics	-
5.15. Alcohol and CNS Depressants	1470
5.16. Epileptogens	-
5.17. Anti Migraine Agents	-
6. NEUROTRANSMITTERS AND SYNAPTIC TRANSMISSION	
6.1. Cholinergic System	1471
Acetylcholine	
Muscarinic receptors	
Nicotinic receptors	
6.2. Adrenergic System	1471
Adrenaline	
Noradrenaline	
Alpha 1 receptors	
Alpha 2 receptors	
Beta 1 receptors	
Beta 2 receptors	
Combinations of alpha and beta receptors	
6.3. Steroid Hormones	1472
6.4. Dopamine	1472
6.5. 5-Hydroxytryptamine (serotonin)	1473
6.6. Histamine	1474
6.7. Inhibitory Amino Acids	1474
Gamma-aminobutyric acid (GABA)	
Glycine	
Taurine	
6.8. Excitatory Amino Acids	1476
Aspartate	
Glutamate	
N-methyl-D-aspartate (NMDA)	
6.9. Calcitonin-Gene-Related-Peptide (CGRP)	1478
6.10. Substance P and Kinins	1478
6.11. Opioids	1478
6.12. Cannabinoid Receptors	1478
6.13. Vasoactive Intestinal Polypeptide (VIP)	1478
6.14. Nitric Oxide	1479
6.15. Cholecystokinin (CCK)	-
6.16. Atrial Natriuretic Peptide	-
6.17. Angiotensin	1479
6.18. Galanin	-
6.19. Nucleotides and Related Substances	-
6.20. Neurotensin	-
6.21. Neuropeptide Y	1479
6.22. Vasopressin (ADH) and Oxytocin	1479
6.23. Endothelin	-
6.24. Somatostatin	-

6.25. Releasing Factors	1479	Alcohol	
6.26. Glutathione	-	Tobacco	
6.27. Neuro-Sensory Toxicology	1479	Cocaine	
6.28. Neuroendocrinology and the Immune System	1481	Morphine and heroin	
7. INTEGRATIVE NEUROPHYSIOLOGY		Hallucinogens	
7.1. Control of Movement	1482	Caffeine	
Neurobiology of exercise		Amphetamines	
Motor learning		9.2. Dementias	1509
7.2. Control of Respiration	1484	9.3. Psychoneuroimmunology	1509
7.3. Control of Blood Pressure	1485	9.4. Behavioural Effects of Neurotransmitters and Hormones	1509
7.4. Memory and Learning	1485	9.5. Psychophysiological Studies	1510
7.5. Control of Sleep	1489	9.6. Behavioural Effects of Neurotoxins	1511
7.6. Control of Feeding and Drinking	1489	9.7. Cognitive Science	1512
7.7. Control of Speech (including Language and Birdsong)	1489	10. NEUROPATHOLOGY	
7.8. Neurobiology of Ageing	1491	10.1. Neoplasia of the Brain and Nervous System	1525
7.9. Neurobiology of Stress	1491	10.2. Alzheimer's Disease	1527
7.10. Biological Rhythms	1493	10.3. Parkinson's Disease	1529
7.11. Thermoregulation	1493	10.4. Other Degenerative Diseases	1530
7.12. Neuromagnetism and Neurophysics	-	10.5. Myelin Defective Disorders	1533
8. SENSORY SYSTEMS		10.6. Huntington's Chorea and Other Inherited Disorders	1533
8.1. General Properties of Sensory Receptors	-	10.7. Autoimmune Diseases	1533
8.2. Muscle Spindles	-	10.8. Viral and Microbial Induced Disorders	1534
8.3. Cutaneous and Joint Receptors	1494	10.9. Prion Induced Disorders	1535
8.4. Auditory System	1494	10.10. Nerve Injury	1535
Outer and middle ear structure		10.11. Neuromuscular Disorders	1536
Inner ear structure (cochlea)		10.12. Movement Disorders	1536
Hair cell and transduction		10.13. Epilepsy	1537
Auditory pathways		10.14. Migraine	1539
8.5. Vestibular System	1495	10.15. Diabetic Neuropathy	1539
8.6. Visual System	1496	10.16. Schizophrenia and Psychoses	1539
Functional anatomy of the eye		10.17. Depression	1542
Retina and photoreceptor transduction		11. INVERTEBRATE NEUROPHYSIOLOGY	
Visual pathways		11.1. Insect Nervous System	1547
Eye movements		11.2. Insect Sensory System	1547
Colour vision		11.3. Other Invertebrate Nervous System	1547
8.7. Somaesthetic System	1501	11.4. Other Invertebrate Sensory System	-
Pain		12. TECHNIQUES	
Mechanoreceptors		12.1. Recording Techniques	1549
Temperature		12.2. Drug Delivery	1553
Olfaction		12.3. Cellular and Subcellular Labelling	1553
Gustation		12.4. Neurobiochemical Techniques	1554
Osmoreceptors		12.5. Computer Applications	1554
Baroreceptors		12.6. Nerve Manipulations	-
Chemoreceptors		12.7. Behavioural Studies	1555
8.8. Lateral Line System	1504	12.8. Disease Models	1555
Mechanoreceptive lateral line		12.9. Diagnostic Techniques	1559
Electroreceptors		13. GENERAL CONCEPTS	
9. BEHAVIOURAL NEUROSCIENCE		13.1. Reviews	1564
9.1. Addiction, Tolerance and Withdrawal Mechanisms	1506	13.2. Symposia	1567
