COVER FIGURE

SLAP/SLAP2 deficiency in platelets results in a dramatic increase in infarct volume in a murine model of ischemic stroke. The image shows coronal brain sections 24 hours after focal cerebral ischemia induced in control mice (top; the red areas are vital tissue) or mice with *Slap*^{-/-}/*Slap2*^{-/-} platelets (bottom; the white areas are cerebral infarctions). See the article by Cherpokova et al on page 185.

EDITORIAL

- 1 **Introduction to a clinical review series on aggressive B-cell lymphoma**
Laurie H. Sehn

INSIDE BLOOD COMMENTARIES

SUBMISSION INSTRUCTIONS

All manuscripts, including figures, should be submitted electronically at <http://submit.bloodjournal.org> to Editor-in-Chief Bob Löwenberg, MD, PhD. Before submitting your paper, review *Blood's* Author Guide at <http://bloodjournal.hematologylibrary.org/site/authors/authorguide.xhtml>. If you need help during the submission process, contact the Editorial Office by phone at 202-776-0548 or via e-mail at editorial@hematology.org.
