

CONTENTS

1. CELLULAR NEUROSCIENCE	
1.1. Molecular Neurobiology and Neurogenetics	1179
1.2. Nervous System Development	1181
Early development	
Neural crest	
Brain and spinal cord	
Peripheral nervous system	
Sensory-auditory	
Sensory-vestibular	
Sensory-visual	
Sensory-somaesthetic	
1.3. Transplantation and Regeneration	1181
1.4. Neurotrophic Factors (including nerve growth factor) (NGF)	1182
1.5. Nerve and Glial Cell Biology	1182
1.6. Receptor Transduction Mechanisms	1185
GTP and G proteins	
cAMP and cGMP	
Phosphorylation and protein kinases	
Inositol phosphates	
Calcium	
Arachidonic acid metabolites	
1.7. Ion Channels	1187
Sodium	
Potassium	
Calcium	
Chloride	
Intracellular pH	
1.8. Enzymes	1187
1.9. Processes and Products of Metabolism	1188
1.10. Lipids, Glycolipids, and Polysaccharides	1189
1.11. Myelin and Membrane Studies	1189
1.12. Proteins	1189
Structure	
Biosynthesis and processing	
Amyloid protein	
2. NERVE STRUCTURE AND FUNCTION	
2.1. Physiology of Nerve Cells	1192
Dendrites	
Axons	
Terminals	
Synaptic transmission	
Bioelectric potentials and membrane permeability	
Neuronal plasticity	
3. PHYSIOLOGY AND PHARMACOLOGY OF THE PERIPHERAL NERVOUS SYSTEM	
3.1. Innervation of Skeletal Muscle	1196
3.2. Innervation of Smooth Muscle	-
3.3. Motoneurons and Spinal Reflexes	1196
3.4. Neuromuscular Junction	1196
3.5. Innervation of the Lungs	-
3.6. Innervation of Cardiac Muscle	1196
3.7. Innervation of the Blood Vessels	-
3.8. Innervation of the Kidney	-
3.9. Innervation of Adrenal Glands	1196
3.10. Innervation of Urinary Tract	-
3.11. Innervation of Reproductive Organs	-
3.12. Innervation of Salivary Glands	-
3.13. Innervation of Oesophagus	-
3.14. Innervation of the Stomach	-
3.15. Innervation of the Intestine	1197
3.16. Innervation of Pancreas	-
3.17. Innervation of the Liver and Gall Bladder	-
3.18. Innervation of Spleen	-
3.19. Sympathetic Nervous System	1197
3.20. Parasympathetic Nervous System	1197
3.21. Enteric Nervous System	1197
3.22. General Autonomic Nervous System	1197
3.23. Local Anaesthetics	1198
4. PHYSIOLOGY OF THE CENTRAL NERVOUS SYSTEM	
4.1. Blood Brain Barrier	1198
4.2. Cerebrospinal Fluid	1199
4.3. CNS and Nerve Circulation	1199
4.4. Spinal Cord	1199
4.5. Meninges	-
4.6. Cranial Nerves	1199
4.7. Brain Stem	1200
Medulla	
Pons	
4.8. Midbrain	1200
4.9. Cerebellum	1200
4.10. Basal Ganglia	1201
4.11. Amygdala	1201
4.12. Hippocampus	1201
4.13. Cerebrum	1202
4.14. Olfactory Bulb	1204
4.15. Visual Cortex	1204
4.16. Habenula	-
4.17. Corpus Callosum	-
4.18. General Telencephalon	-
4.19. Thalamus	1205
4.20. Hypothalamus	1205
4.21. General Diencephalon	1205
4.22. Pituitary Gland	-
Anterior lobe	
Intermediate lobe	
Posterior lobe	
4.23. Pineal	1205
4.24. Ventricles	-
4.25. Dorsal Root Ganglia	1206
4.26. CNS Tracts	-
4.27. Sexual Dimorphism	-
4.28. Brain Morphology	1206
4.29. Neural Networks	1206
5. PHARMACOLOGY OF THE CENTRAL NERVOUS SYSTEM	
5.1. Drugs for Parkinson's Disease	1208
5.2. Other Movement Disorders	-
5.3. Muscle Relaxants (Central)	-
5.4. General Anaesthetics	1209
5.5. Anxiolytics (including Benzodiazepine Receptors)	-
5.6. Sedatives and Hypnotics	1209
5.7. Antipsychotics	1209
5.8. Anticonvulsants	1209
5.9. Analgesics and Antipyretics	1210
5.10. Memory	1210
5.11. Stimulants and Anorectics	1211
5.12. Hallucinogens	-
5.13. Antidepressants	1211
5.14. Anti-emetics	-
5.15. Alcohol and CNS Depressants	1212
5.16. Epileptogens	-
5.17. Anti Migraine Agents	1212
6. NEUROTRANSMITTERS AND SYNAPTIC TRANSMISSION	
6.1. Cholinergic System	1212
Acetylcholine	
Muscarinic receptors	
Nicotinic receptors	
6.2. Adrenergic System	1213
Adrenaline	
Noradrenaline	
Alpha 1 receptors	
Alpha 2 receptors	
Beta 1 receptors	
Beta 2 receptors	
Combinations of alpha and beta receptors	
6.3. Steroid Hormones	1213
6.4. Dopamine	1213
6.5. 5-Hydroxytryptamine (serotonin)	1214
6.6. Histamine	1215
6.7. Inhibitory Amino Acids	1215
Gamma-aminobutyric acid (GABA)	
Glycine	
Taurine	
6.8. Excitatory Amino Acids	1216
Aspartate	
Glutamate	
N-methyl-D-aspartate (NMDA)	
6.9. Calcitonin-Gen-Related-Peptide (CGRP)	1217
6.10. Substance P and Kinins	-
6.11. Opioids	-
6.12. Cannabinoid Receptors	1218
6.13. Vasoactive Intestinal Polypeptide (VIP)	1218
6.14. Nitric Oxide	1218
6.15. Cholecystokinin (CCK)	-
6.16. Atrial Natriuretic Peptide	-
6.17. Angiotensin	1218
6.18. Galanin	-
6.19. Nucleotides and Related Substances	-
6.20. Neurotensin	-
6.21. Neuropeptide Y	1218
6.22. Vasopressin (ADH) and Oxytocin	1218
6.23. Endothelin	-
6.24. Somatostatin	1219

6.25. Releasing Factors	1219	Alcohol	
6.26. Glutathione	-	Tobacco	
6.27. Neuro-Sensory Toxicology	1219	Cocaine	
6.28. Neuroendocrinology and the Immune System	1220	Morphine and heroin	
7. INTEGRATIVE NEUROPHYSIOLOGY		Hallucinogens	
7.1. Control of Movement	1223	Caffeine	
Neurobiology of exercise		Amphetamines	
Motor learning		9.2. Dementias	1248
7.2. Control of Respiration	1225	9.3. Psychoneuroimmunology	-
7.3. Control of Blood Pressure	1225	9.4. Behavioural Effects of Neurotransmitters and Hormones	1248
7.4. Memory and Learning	1225	9.5. Psychophysiological Studies	1248
7.5. Control of Sleep	1229	9.6. Behavioural Effects of Neurotoxins	1250
7.6. Control of Feeding and Drinking	1229	9.7. Cognitive Science	1250
7.7. Control of Speech (including Language and Birdsong)	1229	10. NEUROPATHOLOGY	
7.8. Neurobiology of Ageing	1230	10.1. Neoplasia of the Brain and Nervous System	1265
7.9. Neurobiology of Stress	1231	10.2. Alzheimer's Disease	1268
7.10. Biological Rhythms	1232	10.3. Parkinson's Disease	1270
7.11. Thermoregulation	1232	10.4. Other Degenerative Diseases	1272
7.12. Neuromagnetism and Neurophysics	-	10.5. Myelin Defective Disorders	1274
8. SENSORY SYSTEMS		10.6. Huntington's Chorea and Other Inherited Disorders	1274
8.1. General Properties of Sensory Receptors	-	10.7. Autoimmune Diseases	1274
8.2. Muscle Spindles	-	10.8. Viral and Microbial Induced Disorders	1276
8.3. Cutaneous and Joint Receptors	1233	10.9. Prion Induced Disorders	1278
8.4. Auditory System	1234	10.10. Nerve Injury	1278
Outer and middle ear structure		10.11. Neuromuscular Disorders	1278
Inner ear structure (cochlea)		10.12. Movement Disorders	1279
Hair cell and transduction		10.13. Epilepsy	1279
Auditory pathways		10.14. Migraine	1281
8.5. Vestibular System	1235	10.15. Diabetic Neuropathy	1281
8.6. Visual System	1236	10.16. Schizophrenia and Psychoses	1282
Functional anatomy of the eye		10.17. Depression	1283
Retina and photoreceptor transduction		11. INVERTEBRATE NEUROPHYSIOLOGY	
Visual pathways		11.1. Insect Nervous System	1285
Eye movements		11.2. Insect Sensory System	1285
Colour vision		11.3. Other Invertebrate Nervous System	1286
8.7. Somaesthetic System	1239	11.4. Other Invertebrate Sensory System	1286
Pain		12. TECHNIQUES	
Mechanoreceptors		12.1. Recording Techniques	1288
Temperature		12.2. Drug Delivery	-
Olfaction		12.3. Cellular and Subcellular Labelling	1292
Gustation		12.4. Neurobiochemical Techniques	1292
Osmoreceptors		12.5. Computer Applications	1293
Baroreceptors		12.6. Nerve Manipulations	-
Chemoreceptors		12.7. Behavioural Studies	-
8.8. Lateral Line System	1242	12.8. Disease Models	1293
Mechanoreceptive lateral line		12.9. Diagnostic Techniques	1297
Electroreceptors		13. GENERAL CONCEPTS	
9. BEHAVIOURAL NEUROSCIENCE		13.1. Reviews	1303
9.1. Addiction, Tolerance and Withdrawal Mechanisms	1244	13.2. Symposia	1306
