### Review

*School Library Journal:* "This anthology includes essays that initially appeared in periodicals, newspapers, books, government documents, and public and private organizational publications...A balanced presentation for highly controversial views, the selections differ in style and polish; some are carefully reasoned, and others are emotionally charged. Three major sections explore the dimensions of the problem, its causes, and possible remedies. Pulling no punches, this title covers its subjects well. Useful for research, for reports, and for debates."
