書名：Bioethics in a changing world

作者：Jennifer A. Parks、Victoria S. Wike

內容簡介：*Bioethics in a Changing World* is an introductory textbook for individuals who are new to the study of bioethics. This interdisciplinary field, which encompasses philosophy, religion, sociology, gerontology, psychiatry, biomedical science, law, and nursing (to name a few), has been rapidly growing and developing over the last half-century. In order to get a handle on what “doing” bioethics entails, it is helpful to start with the basic philosophical foundations of bioethical theory and then consider a variety of trenchant issues that arise from the practice of medicine and the provision of health care services within an age of technology. In constructing this textbook, the central aim has been to guide readers in developing a clear sense of how theory and practice are linked in the dynamic field of bioethics. Though new problems and issues in bioethics are constantly arising, it is important to focus on the persistence of foundational questions that apply to new contexts.

目錄：

Chapter1 Theories and values in bioethics

Chapter 2 Roles, responsibilities, and relationships

Chapter 3 Justice and health care

Chapter 4 Experimentation and research on human subjects

Chapter 5 Health, normalcy, and the “abnormal” patient

Chapter 6 Beginning of life

Chapter 7 Genetic technologies

Chapter 8 Organ donation and transplantation

Chapter 9 Aging

Chapter 10 Issues at end of life

Chapter 11 Future directions in bioethics
